

Block Draw!

by Cat's Clutter

Things we've noticed in our classroom

1. Block coding platforms prioritise building over comprehension :(

Typical block coding - very brute forceable!

The image shows a Scratch workspace with a Star Wars-themed backdrop. In the scene, BB-8 is positioned near some crates, and R2-D2 is nearby. A speech bubble from a character off-screen says, "We need that scrap metal. BB-8, can you get it?" Below the workspace is a large orange "Run" button.

Blocks

- move up ▾
- move down ▾
- move left ▾
- move right ▾

Workspace:

```
when run
move [left v]
```

Things we've noticed in our classroom

1. Block coding platforms prioritise building over comprehension :(
2. Tracing is boring! :/

Things we've noticed in our classroom

1. Block coding platforms prioritise building over comprehension :(
2. Tracing is boring! :/
3. Going Solo Isn't Always Fun

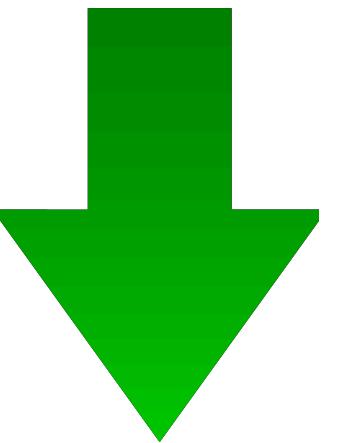

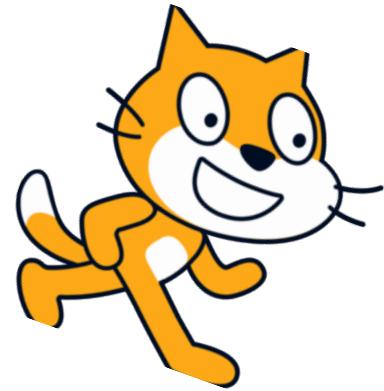

Things we've noticed in our classroom

1. Block coding platforms prioritise building over comprehension :(
2. Tracing is boring! :/
3. Going Solo Isn't Always Fun
4. The puppy you designed is lovely, but... this isn't art class!

Our Solution - BlockDraw!

Take **Kahoot**, **Scribble.io** and **Scratch**, and
combine them!

BlockDraw!
